 1.11A. FACSIMILES, PHOTOCOPIES, AND OTHER REPRODUCTIONS.

**Non-Microform Reproductions<sup>1</sup>**

*PCC practice:* Catalogers should be aware of the BIBCO Provider-Neutral E-Monograph Guide (<http://www.loc.gov/catdir/pcc/bibco/PN-Guide.pdf>) and the CONSER Aggregator-Neutral policy (see section 31.2.3 at <http://www.loc.gov/acq/conser/pdf/Module31.pdf>) and apply those policies rather than the guidelines below when appropriate.

*LC practice:* Follow these guidelines for reproductions of previously existing materials that are made for: preservation purposes in formats other than microforms; non-microform dissertations and other reproductions produced "on demand"; and, electronic reproductions.

These guidelines identify the data elements to be used in the record for the reproduction, separate from the record for the original. For some electronic reproductions, however, LC may delineate details of the reproduction on the record for the original manifestation rather than create a separate record for the reproduction. LC catalogers should consult "Draft Interim Guidelines for Cataloging Electronic Resources" <[http://lcweb.loc.gov/catdir/cpsoc/dcmb19\\_4.html](http://lcweb.loc.gov/catdir/cpsoc/dcmb19_4.html)> for more information (other cataloging agencies may have developed their own guidelines in this regard).

1) Transcribe the bibliographic data appropriate to the *original* work being reproduced in the following areas:

title and statement of responsibility  
edition

---

<sup>1</sup> A reproduction is a manifestation that replicates an item (or a group of items) or another manifestation (e.g., a reprint with no changes) that is intended to function as a substitute. The reproduction may be in a different physical format from the original. Reproduction is generally a mechanical rather than an intellectual process. The physical characteristics of the reproduction such as color, image resolution, or sound fidelity are influenced by the particular process used to create it, and therefore may differ from those of the original. Reproductions are usually made for such reasons as the original's limited availability, remote location, poor condition, high cost, or restricted utility.

Cataloger judgment will be required to distinguish electronic reproductions from electronic republications or simultaneous publication in analog and digital form (only reproductions are covered by this LCRI). For example, an electronic reproduction produced using scanning techniques that results in a facsimile reproduction may be easily identified as a reproduction. Other non-facsimile electronic reproductions may also be considered under this LCRI when they purport to be a reproduction of the original and can serve as a surrogate for the original. Other cataloging agencies choosing to follow this LCRI may need to develop their own criteria for distinguishing reproductions from manifestations judged not to be reproductions. In cases of doubt, or in cases where there is inadequate information about the original on which to base a description, do not consider the electronic manifestation to be a reproduction.

## 1.11A

---

material (or type of publication) specific details  
publication, distribution, etc.  
physical description  
series

2) If appropriate, give in the title and statement of responsibility area the general material designation that is applicable to the format of the *reproduction* (cf. LCRI 1.1C).

3) Give in a single note (533 field) all other details relating to the *reproduction* and its publication/availability. Include in the note the following bibliographic data in the order listed:

format of the reproduction  
dates of publication and/or sequential designation of issues reproduced (for  
serials)  
place and name of the agency responsible for the reproduction<sup>2</sup>  
date of the reproduction  
physical description of the reproduction if different from the original  
series statement of the reproduction (if applicable)  
notes relating to the reproduction (if applicable)<sup>3</sup>

Apply rules 1.4-1.7 for the formulation of the bibliographic data in the 533 field note. Enclose cataloger-supplied data in brackets. Omit the area divider (space-dash-space).

4) Use a physical description fixed field (007) applicable to the reproduction. For electronic reproductions, also supply information about the electronic location and access (856 field).

---

<sup>2</sup> Consider the "agency responsible for the reproduction" to be the agency that selected the material to be reproduced, arranged for reproducing the material, exercised control over production formats, has overall responsibility for quality, etc. If the agency is unknown, give "[s.n.]"; if place and agency are unknown, use "[S.l. : s.n.]." Transcribe also the name of the agency from which to secure copies or the agency that made the reproduction if the agency is named in one of the prescribed sources for the publication, distribution, etc., area of the reproduction.

<sup>3</sup>Other cataloging agencies choosing to follow this LCRI may have compelling local reasons (e.g., data manipulation) for recording notes relating to the reproduction in other than the 533 field (e.g., system requirements (538), restrictions on access (506)).

---

Examples (do not necessarily include all applicable data elements):

007 st#pmndmb|||||  
245 10 \$a Barcarolle, op. 10, piano solo \$h [sound  
recording] / \$c Sergei Rachmaninoff. Valse
